Segments | How to can I export leads from Twitter/LinkedIn using Blaze?

Written by Team Blaze

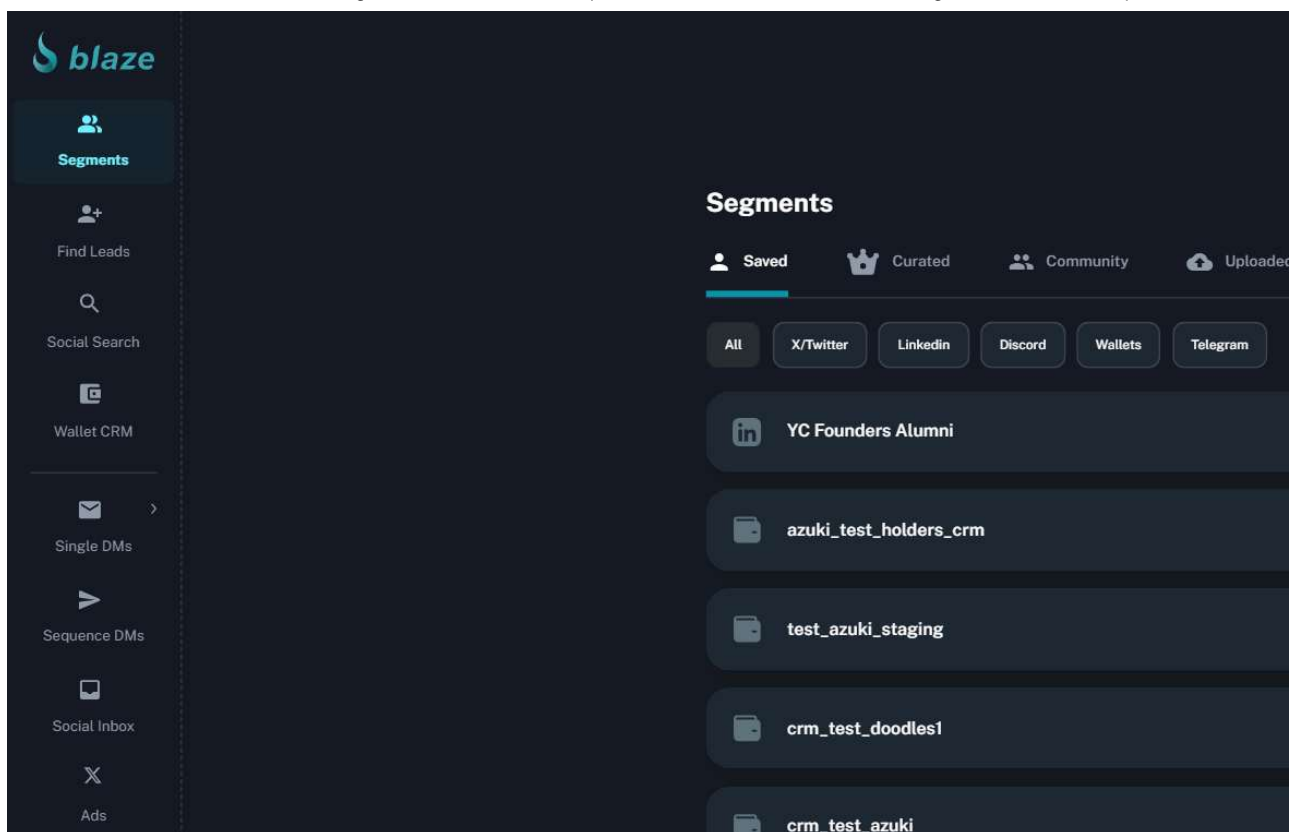

Updated over 4 months ago

[Table of contents](#)

If you're looking to export leads from your Twitter or LinkedIn campaigns, Blaze makes it simple and efficient. Here's a step-by-step guide on how to download your leads directly from the platform.

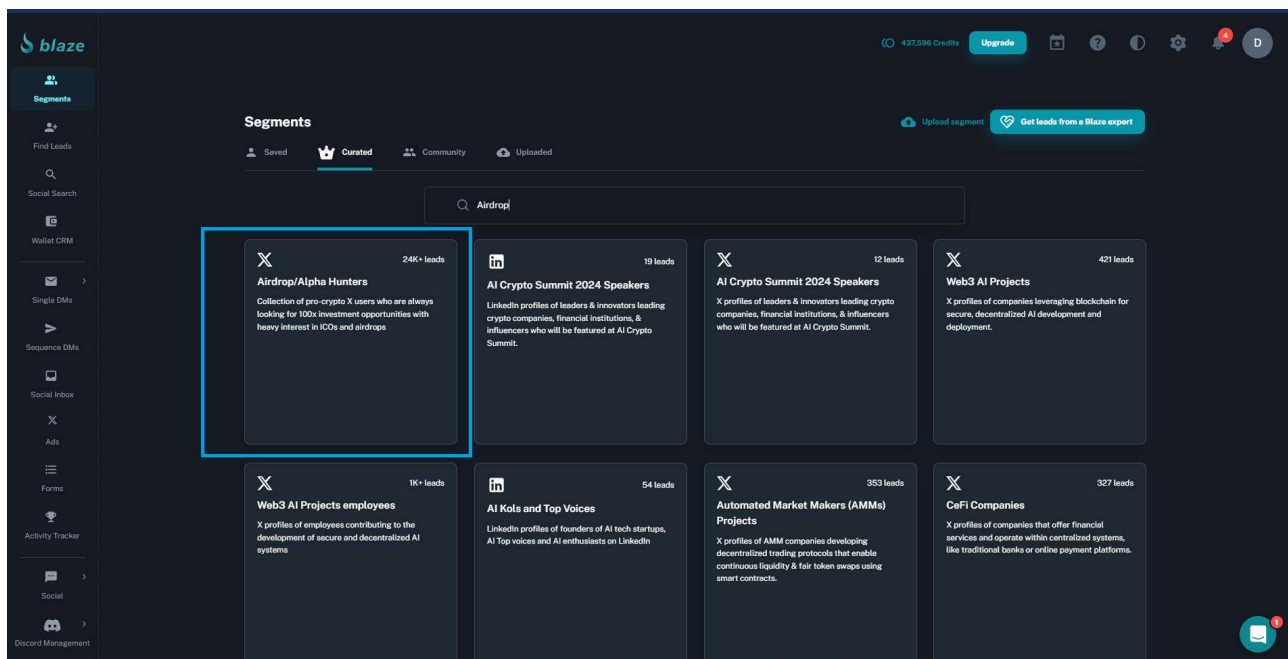

1. Go to Segments

Navigate to the **Segments** section within your Blaze dashboard.

2. Choose a Segment

From the **Saved/Curated Segments** list, select the segment you wish to export leads from.

3. Export Leads

Once the segment is loaded, select the leads by clicking on the checkbox against them and click on the **Export** button to download.

The screenshot shows the Blaze platform interface for the 'Airdrop/Alpha Hunters' segment. The interface includes a sidebar with filters, a main table of leads, and an 'Export' button highlighted with a yellow arrow.

You can export leads from any segment with ease! Each lead export will cost **0.1 credit per lead**. If you have any questions or need assistance, feel free to reach out to us at support@withblaze.app.

At Blaze, we've designed our platform to support full automation, including DMs, ads, and analytics, right within the platform.

Since this is proprietary data of Blaze, lead exports are charged at **0.1 credit per lead**. If you have specific requirements, please contact us at support@withblaze.app, and we'll be happy to assist you!
