Upload CSV

Creating uploaded segment

Note: For wallets uploaded segment, we use Wallet CRM. Check out this [link](#).

Upload csv option

For Twitter/X or LinkedIn uploaded segment, follow the guide below:

1. Head to Segments and click on "Uploaded" on the top of the table
2. Click on the "Upload Segments" button on top right
3. Click on the "Upload CSV" button
4. Upload a CSV by clicking on the upload CSV button
5. Map your columns to the pre-existing headers
6. Click upload to upload your segment

Note:

When uploading LinkedIn links or usernames for the "Uploaded" segment in

Blaze, **only the individual's LinkedIn username** (i.e., the part after

≡ [Blaze.com/in/](#)) is supported.

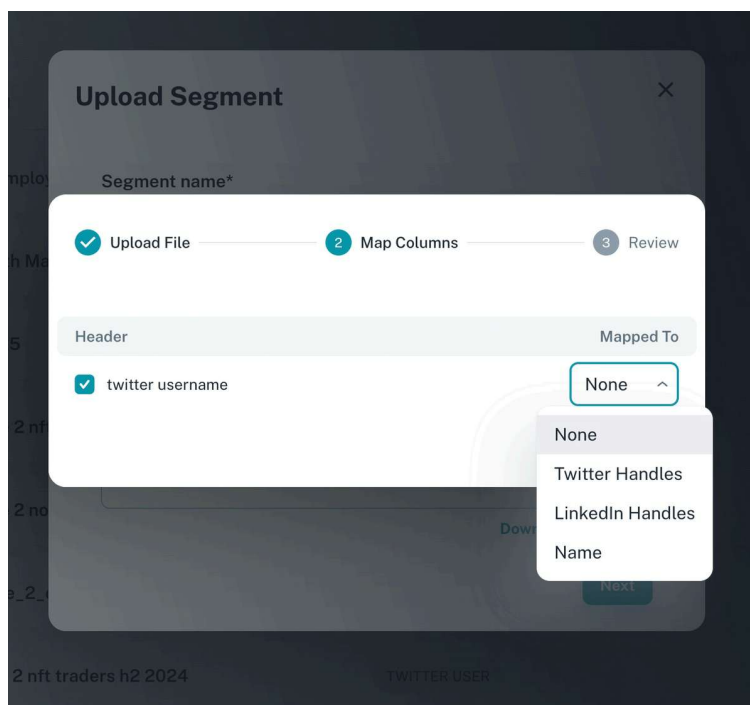

We **do not support** LinkedIn FSIDs, company profile URLs, or company usernames.

After uploading the CSV map the entries to the column mappings. Supported column mappings on Blaze are given below.

Column Mappings:

1. **Twitter Handles:** Indicates the Twitter Handle of the lead in the segment uploaded
2. **LinkedIn Handles:** Indicate the LinkedIn Username of the lead in the segment uploaded
3. **Name:** Indicates the name of the lead in the segment uploaded
