How to schedule a post on Warpcast on Blaze?

Run your social media calendar on Blaze with complete automation.

Written by Team Blaze

Updated over 8 months ago

Managing your Twitter content calendar on Blaze is simple with the posting and scheduling functionality. Here's how you can schedule a tweet:

1. Access the Post Section

Navigate to the **Social** tab on the left-hand sidebar and click on the **Schedule Post** section from the dropdown menu.

The screenshot displays the 'Segment Creation' interface in the Blaze application. The left sidebar contains navigation options: Segments, Find Leads, Social Search, Wallet CRM, Single DMs, Sequence DMs, Social Inbox, Ads, Forms, Activity Tracker, Social, X Listening, and Discord Management. The main area is titled 'Segment Creation' and includes tabs for Twitter Audience, LinkedIn Audience, Telegram Audience, and Wallet Audience. A 'Filters' panel is open, showing a search bar, a 'Has Identifier' section with social media icons, a toggle for 'Exclude leads with closed DMs', and expandable sections for 'Segments', 'PERSONAL', 'Bio', and 'Country'. A 'Schedule Posts' dropdown menu is visible, listing options like 'Manage your X & Farcaster content calendar', 'Post Library', 'Tweet templates to get inspiration for your next tweet', 'Top Posts', 'Monitor engagement for your past tweets', 'X Analytics', and 'Monitor your X growth and engagement'. The right side shows a list of leads with columns for Avatar, Twitter Handle, Name, and Bio. The list includes entries like 'ert1753714', 'Egnaeasy', 'moro3plugga', 'Jason99mi', '0101000101an', 'conkhongngaydo', 'mengyanIng', 'trananh9x1', 'Olana90704243', 'MYevday', 'Alexand458900', 'TJIWhiteIV', and 'ShabnamVines'. At the bottom, a pagination bar shows '1-25 of 168956540'.

2. Create a New Post

In the Post section, click on **New Post**.

A modal window will appear where you can compose your tweet.

3. Select Warpcast

Once in the new post window, tab across to **Warpcast** in the top-right corner.

Compose the post and preview it side by side.

Tip:

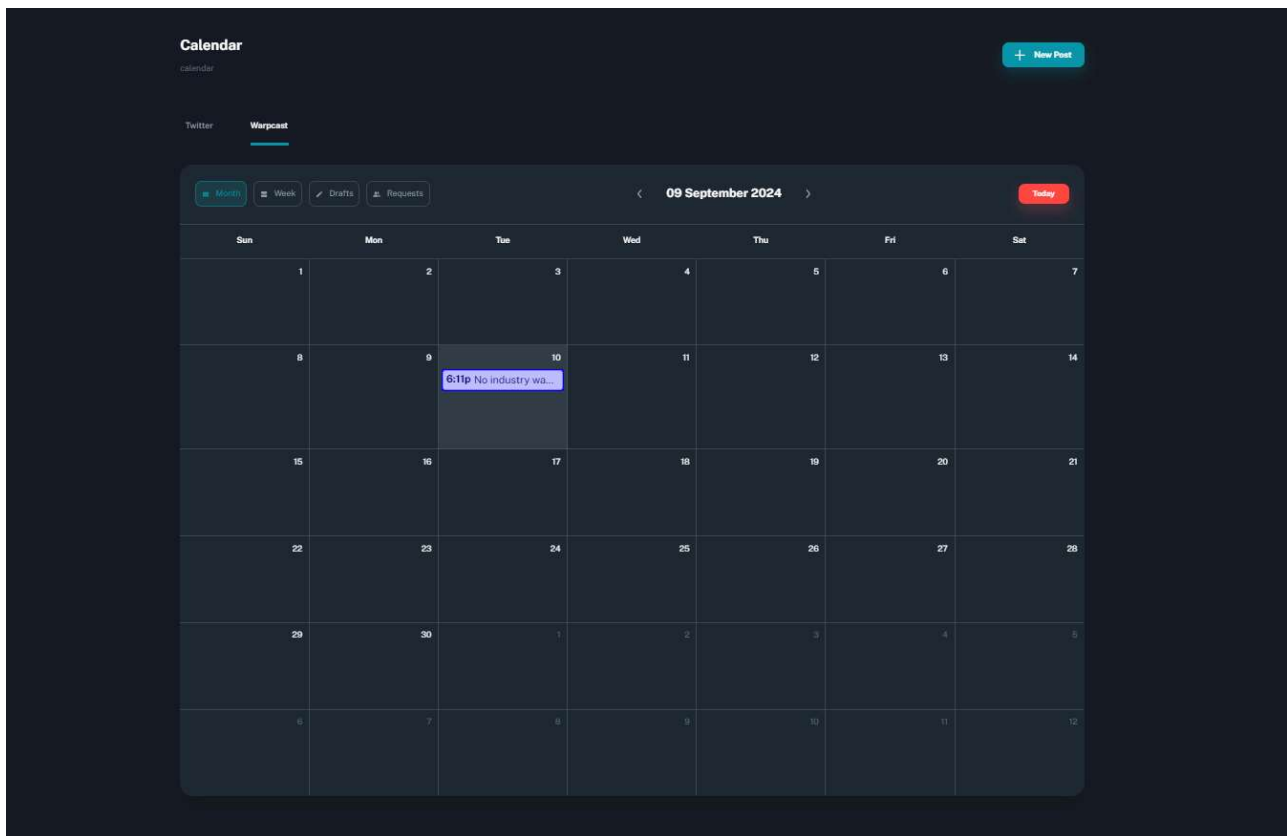

If you'd like to create a thread, use the **+** or **–** button in the modal to add or remove posts within the thread.

3. Schedule Your Post

- To post immediately, toggle the **Post Now** option.
- To schedule the post for later, toggle **Schedule** and input your preferred date and time for the tweet to go live.

4. View Your Calendar

You can view all past and upcoming posts on the **content calendar**, located in the same section. This helps you keep track of scheduled posts and maintain consistency in your content strategy.

With these steps, you can efficiently schedule and manage your Warpcast posts using Blaze!
