

FUNDAMENTALS

Getting set up

 Make sure whoever sets up Blaze has admin privilege in Discord and access to your Twitter account. You can always add your team to the workspace later!

1. Head on over to <https://withblaze.app/signup> to sign up for our 1 week free trial.
2. Add your integrations
3. Invite your team by clicking on Team in settings and adding your teams emails. Tell your colleague to check their email, and sign up to Blaze using the email they received the invite on.
