

[PRODUCT GUIDES](#) > [LEAD GEN AND SEGMENTS](#) > [HOW TO UPLOAD SEGMENTS](#)

Paste URLs

Twitter

- Head to Segments and click on "Uploaded" on the top of the table
- Click on the "Upload Segments" button on top right
- Click the "Paste URLs" button
- Enter the twitter handles in a comma separated format or single space separated values, without the @ symbol
- Name the segment and click upload
- The segment gets created under the Uploaded Tab of "Segments"

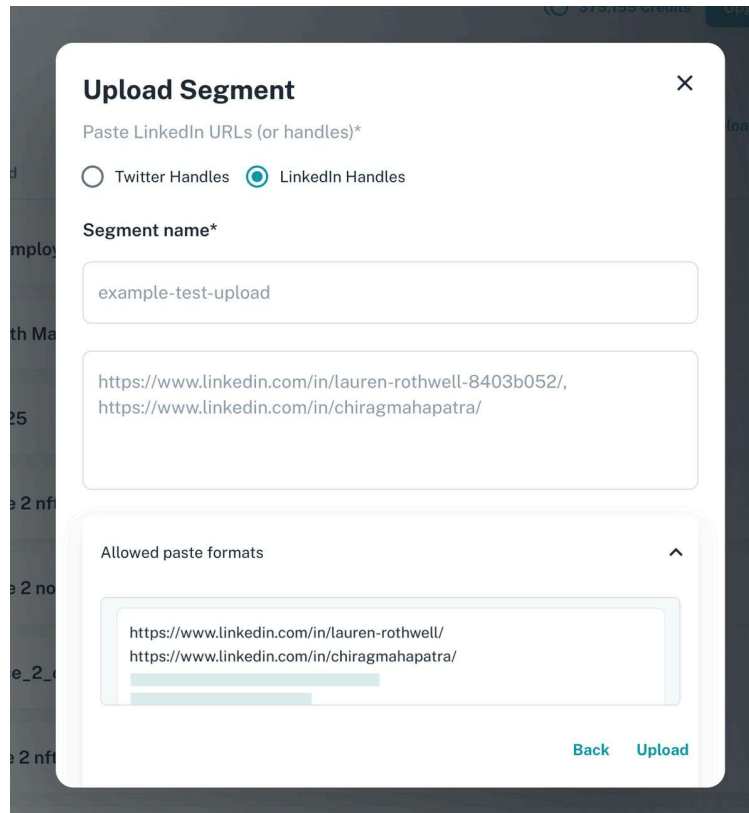

Pasting twitter urls

LinkedIn

- Head to Segments and click on "Uploaded" on the top of the table

- Click on the "Upload Segments" button on top right
- Click the "Paste URLs" button
- Enter the LinkedIn handles in a comma separated format or single space seperated values
- Name the segment and click upload
- The segment gets created under the Uploaded Tab of "Segments"

Pasting linkedIn urls

 Note that the twitter and linkedIn handles are case sensitive

 **Note:**
When uploading LinkedIn links or usernames for the "Uploaded" segment in Blaze, **only the individual's LinkedIn username** (i.e., the part after `linkedin.com/in/`) is supported.
We **do not support** LinkedIn FSIDs, company profile URLs, or company usernames.
