How to create a lead list using Find Leads feature

Filter on blaze's twitter leads database and create segments

Create a segment:

- Head to Find Leads, there you can create 4 types of segments **Twitter, LinkedIn, Telegram and wallet audience**.
- Select any one type of audience and [filter Blaze's databases](#) and select the leads that fit your ideal users
- Save the segment by clicking "Create Segment" on the top of the table
- The segments will be saved to the [Saved](#) section of the segments tab and be accessible when you are preparing to launch a campaign

 Note: Check [How to filter segments](#) to learn to create segments easily.
