You can send direct messages to your community members directly from Blaze.

Here's the step to send dms:

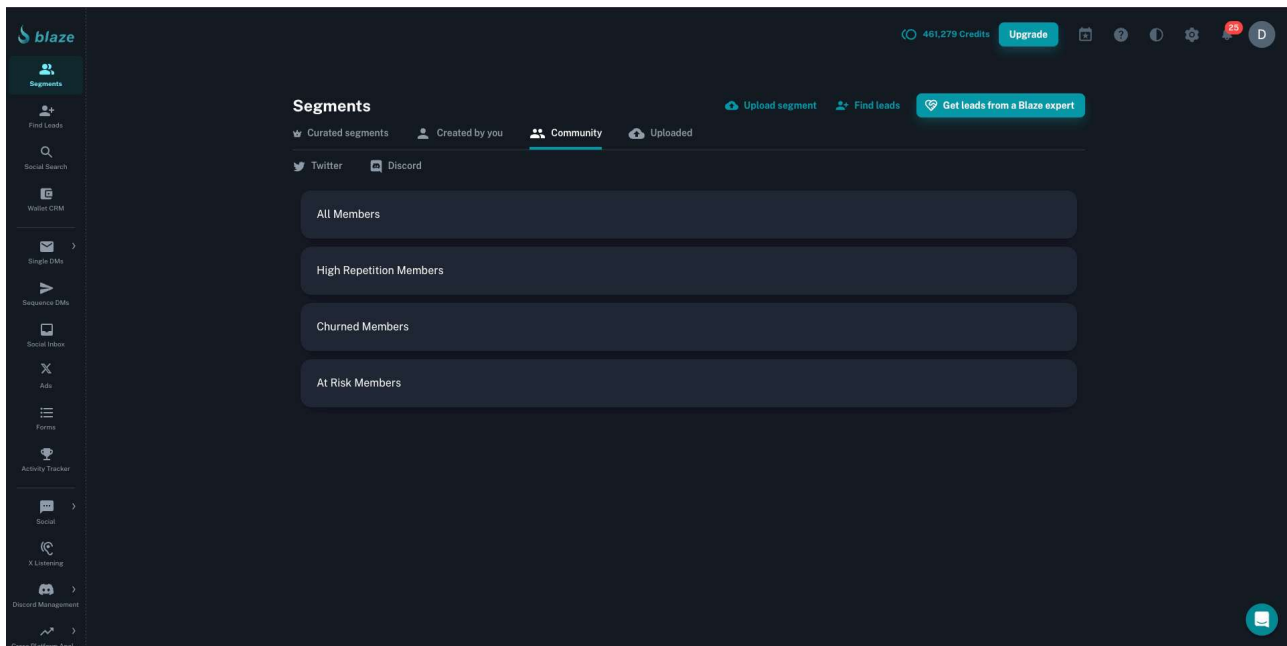

Step1: Go to "Segments" on Blaze

Step2: Go to "Community"

Step3: Click on "Discord"

Step4: Select the members you wanted to send DMs from the above options

Step6: After creating the segment, click on "Start Campaign" to initiate it. Alternatively, you can go to the Single DM section and start a new campaign from there. In the meantime, create a message template using the Single DMs tool.

Finally, select a campaign name, choose the template you created, and apply the segment. Save your settings and run the DM campaign.
