# What can we get on Discord Analytics?

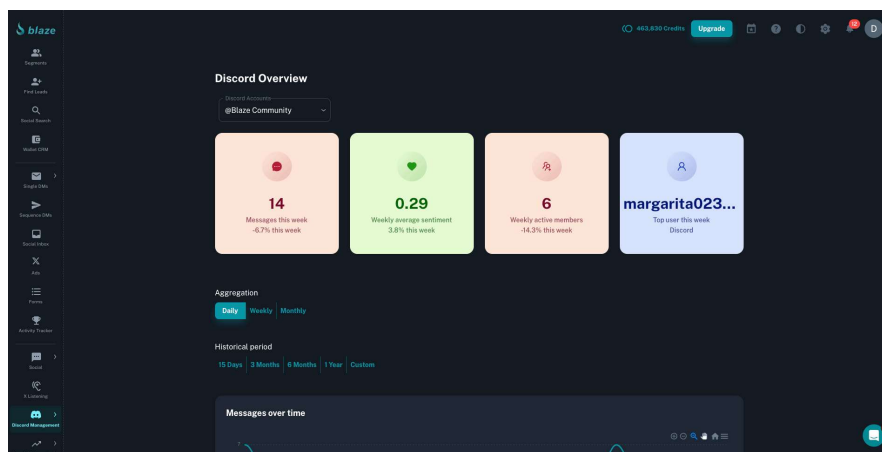

Written by Team Blaze

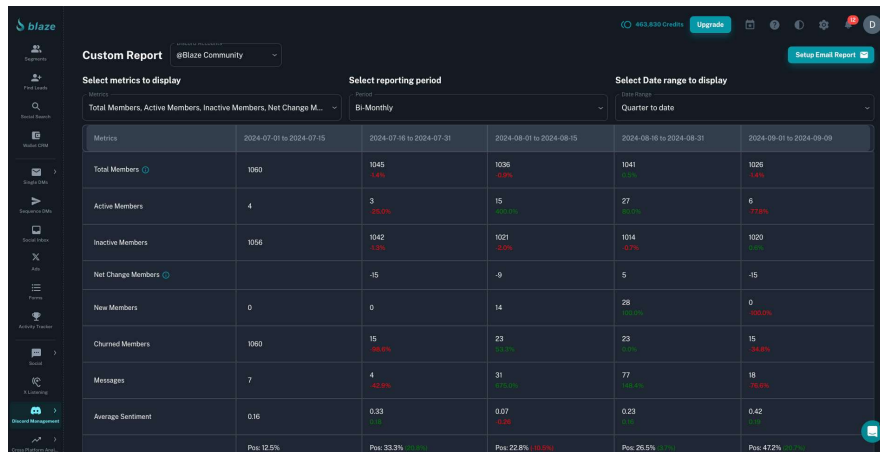

Updated over 8 months ago

When you integrate Discord with our platform, you'll gain access to several features. Here's a brief overview of what each feature does:

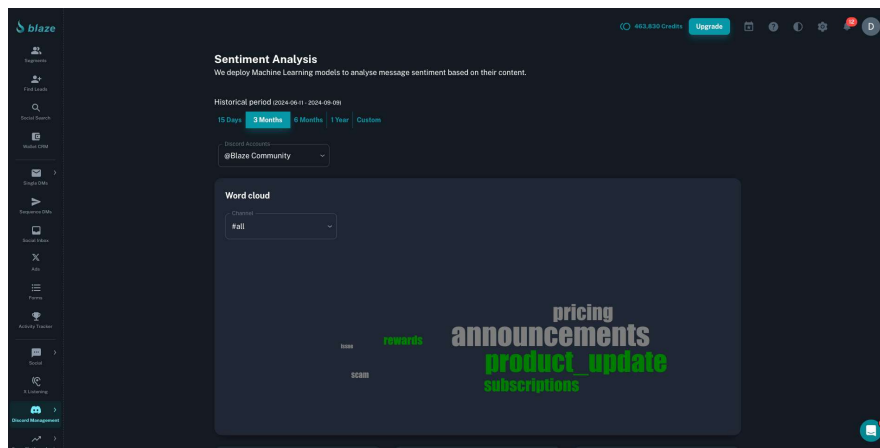

- **Overview** - This feature provides a complete overview of all activities on your Discord server.

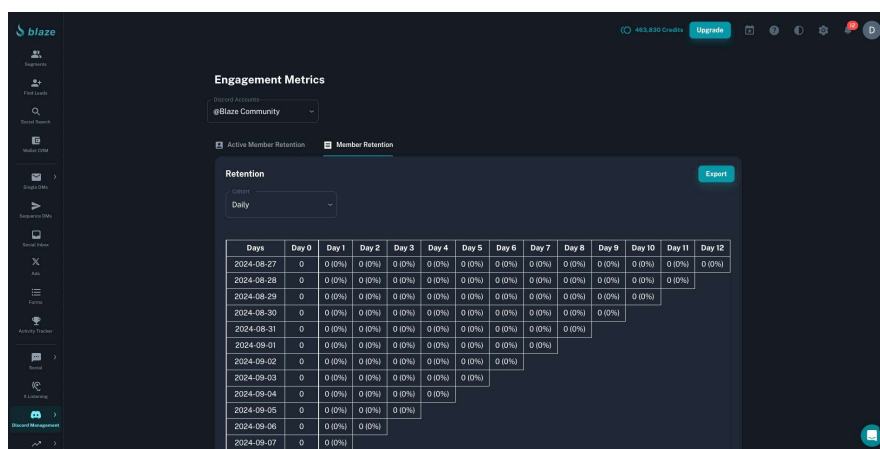

- **Custom Report**- This feature provides bi-weekly, monthly, and weekly reports on the overall performance of your server.

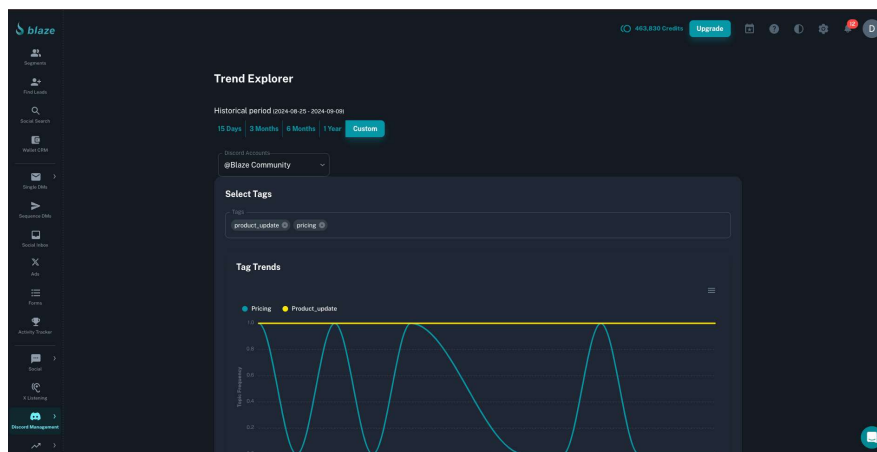

- **Sentiments**- It will show user reactions to each post and analyze sentiments based on reactions and replies. You'll also get visual insights that help you understand the right approach for your marketing strategy.

- **Engagement**- This feature displays user engagement analytics, retention rates, growth rate, and channel performance, highlighting which channels have the most engagement.

- **Trend Explorer**- This feature provides an analysis of each tag used in the posts, along with a graphical representation of trends. For example, you can track tags like "product," "marketing," "insights," and more.

- **Messages** - You can access all messages posted in the server, along with the sentiment analysis of each post.

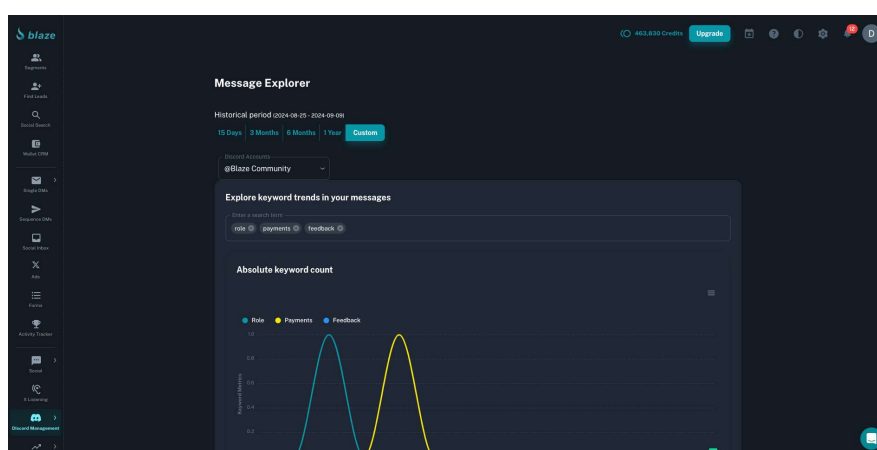

**Messages**

We only show messages that we have detected a topic for from the last 15 days. To learn more about messages, click [here](#).
