Telegram Audience filters

General Filters:

1. **Using Search:** This as an open search filter which allows you to enter any keyword/phrase. This filters values across the Telegram database.

2. **Exclude bots:** Helps exclude bot accounts from the database

3. **Exclude potentially fake accounts:** Helps exclude potentially fake accounts from the database

4. **Exclude non-premium telegram users:** Helps exclude non-premium telegram users from the database

Personal Filters:

1. First Name: First name associated with the user

2. Last Name: Last name associated with the user

3. Username: Telegram user name associated with the user (usually comes in the format of https://t.me/< ↗username>

4. Bio: Bio / Summary associated with the user

5. Groups they are a member of: Indicates the telegram groups that they are associate with or a part of.

Advanced Filter operations

1. **Include:** This allows you to include a set of phrases/keywords

2. **Exclude:** This allows you to exclude a set of phrases/keywords

3. **Min**: Checks if the chosen measure is more than a specified value.

4. **Max**: Checks if the chosen measure is less than a specified value.
