Lead Generation

Segments

∨ What type of links work with LinkedIn Upload Segment

When uploading LinkedIn links or usernames for the "Uploaded" segment in Blaze, **only the individual's LinkedIn username** (i.e., the part after `linkedin.com/in/`) is supported.
We **do not support** LinkedIn FSIDs, company profile URLs, or company usernames.

∨ What does segment mean on Blaze?

It is a list of audience that can be curated by applying various filters. A segment contains leads which can be used as leads for sales and outreach.

∨ What are different types of segments on Blaze?

Refer to this link ↗ to understand the different segments on Blaze.

∨ How does Uploaded Segments work?

You can upload segments manually or upload a csv with the required data.

To upload segments manually, refer to this link ↗.

To upload a csv, refer to this link ↗.
